Erledigt   How to create or edit own OzmosisDefaults.plist

Beitrag von „RA.UZ" vom 20. Dezember 2017, 00:21

Hello everyone! Please tell me where to download the untouched OzmosisDefaults.plis? and
how to edit?
I downloaded the finished one but I did not like it because for all users same serial and system,
I want to do a piece for myself only? thank you in advance 😄 honestly
I do not earn money from this, in our country, not who does not
interest and even does not know what hakintosh, they even do not know
what macOS, our people use 99% of PCs!
