Zitat

My sons wife died due to complications of a severe brain damage and thus is this the end of Piker's involvement in the Hackintosh community.

All he wants now is time to recover. Time for himself and his children.

Merry Christmas to all of you,

Something Bad Happened

This is the ultra short explanation of why Pike isn't blogging:

Pike's wife was hit by a car five weeks ago and Pike is visiting the hospital with his children every day and he has no time, nor is he interested in blogging about it or Apple stuff.
