- 1) Flash BIOS is OK
- 2) After restart, the menu appears where you can select WIN or OSX installation
- 3) install OSX and the Apple logo will appear
- 4) After 4 seconds restart is done and it is still in the wheel

after your customization has disappeared the option of setting the CPU in bios (before editing there was this option) and I can not set the BIOS ([https://www.hackintosh-forum.d...category=37-Installation-](https://www.hackintosh-forum.de...category=37-Installation-von-macOS) von-macOS) for a successful installation
