[Gelöst] Ozmosis GA Z77P-D3 - Problems encountered

Beitrag von „Fredde2209“ vom 12. Januar 2018, 18:19

Yes of course I can try to replace the logo in your bios, but...

1. there is no guarantee that it will work at all. So it can happen, that it will not be possible to get a proper logo at all.
2. it will not be 100% the original logo. It may not be centered exactly (higher) and sometimes it gets a little stretched. So it might occur, that the logo just looks not as nice as the original one.

Please remind me on Sunday again, I will not have time for that tomorrow.
