Erledigt Hp 8470p Fixes!

Beitrag von „pole" vom 15. Januar 2018, 22:42

So,

First a I was deleting the "NullCPUPowerManagement.kext" then restart and I got some error. (pics)
Second I added the dsdt.aml to the box (without NCPM.kext), save and restart, same result.
The nullpower... is a desktop support kext, isn't it?

I created ssdtPRGen.sh beta with /ssdtPRGen.sh -c 3 command.

I am totally confused.
