

Erledigt problem audio alc1200

Beitrag von „griven“ vom 29. Januar 2018, 22:59

This is one reason among others why we don't recommend multibeast...
Your ALC1200 codec will work perfectly fine with AppleALC.kext and Lilu.kext placed on your EFI partition in /Efi/Clover/kexts/Other.

Simply add them and edit your config.plist. Tick FixHDA in the ACPI Section and add 1 in the devices section under audio and you're done.
