Neue Themes / Ozmosis GUI / BootMenü / UserInterface

Beitrag von „Pelikan213“ vom 31. Januar 2018, 21:46

Hi! Thanks!

I have CSM - Option in BIOS

CSM Support - Always

Boot make selection - UEFI only

PXE Boot Option Control disabled

Storage Boot Option Control - Legacy only

Display Boot Option Control - legacy only

I tried switch Display boot to UEFI only - but in mac os I saw red screen than))))

So you think I need to switch CSM support to disable?
