ozmosis und shiki

Beitrag von „kuckkuck“ vom 15. Februar 2018, 21:42

Are there's nothing about the HD 4000 in the SystemReport?

Are you using this [VDADecoderChecker](#)?

You can also try using 0x01620006.

Also you can try using shiki with the bootarg: shikigva=60
