

Erledigt ozmosis und shiki

Beitrag von „veranyon“ vom 15. Februar 2018, 22:07

1. and 3. Yes. I'm use 0x01620007. "fake connector" or one that haven't connectors.
 2. Get that variant also. Got the same rusult (as in that post [ozmosis und shiki](#)).
- May be better will I attach bootlog.txt and config.plist? I had add it in that post.
<https://drive.google.com/file/...YRrZkfQX/view?usp=sharing>
4. will test it. Thank you.

#####UPDATE#####

My video card is (more certainly name): R9 280X 3G GDDR5 PCI-E DVI-I/DVI-D/HDMI/DP DUAL-X
OC VERSION (UEFI)
