MECHREVO Deap Sea X1 Clover Bootloader macOS 10.12.6

Beitrag von „iPhoneTruth“ vom 23. Februar 2018, 09:43

Hello and Wellcome!

1. Put all your kexts in EFI/CLOVER/kexts/Other, no one in EFI/CLOVER/kexts/10.12.
2. For FN-Keys intall [Karabiner](https://pqrs.org/osx/karabiner/)-Elements. Download this freeware on <https://pqrs.org/osx/karabiner/>
3. For sharing files use "Erweiterte Antwort", there you can upload files.
