

Erledigt iMac Pro Xeon Build

Beitrag von „turboyoda“ vom 6. März 2018, 20:59

Danke für die freundliche Begrüßung 😊

[@iMarc](#) - I also have egpu case, and I tested Vega Frontier with Macbook Pro which is on beta High Sierra - no luck so far, at least for me.

I was also thinking about water based cooling, but I had some bad experiences with water and expensive hardware, so I'm staying with air.

I was reading about aptiomemoryfix.efi and native nvram support but wasn't sure if that was the right way to go. I'm switching now to aptiomemoryfix.efi - thanks for the tip 😊
