Samsung SSD sehr langsam + APFS

Beitrag von „Politic“ vom 7. März 2018, 20:40

It depends on what SSD on your computer. Some SSD disks do not support Mac Trim.

I have a Crucial SSD drive, TRIM turned on and no problem.

I only have a brake in the graphics when booting. Boot takes 30-35 seconds. Windows 10-15 ...

I do not know why the boot stops, the broken Apple logo appears, and then the boot continues.

Why ?????
