

Kurzanleitung: High Sierra, Mojave ,Catalina, BigSur und Ventura auf ASUS Zenbook UX330UAK

Beitrag von „xShift“ vom 15. März 2018, 23:41

Hi. I use most of you patches for my asus k541u but no one works with Fn keys and ACPI keyboard. Patch and kext for élan 1200 works but right tap(click on right button) won't work.

Can you help me with touchpad and with battery? Standard patch don't work. Sleep now works without patches but touchpad after sleep won't work ...

Thanks for EFI folder.
