## **Ozmosis Bios / Clover mit High Sierra für meine Workstation Asus x99 A2**

**Beitrag von „cecekpawon“ vom 27. März 2018, 01:57**

Hey, thank you for trying DBounce LOL.

Ive added small wiki on repo regarding Oz & DBounce. [Please check](#) 😊

1. DriverBinding were removed, so wont see DBounce with "bcfg driver dump" anymore.
2. Oz path need to be loaded on DriversList (please check wiki).
3. Heres online tool to minify plist, so you can load the stripped version / result into ROM (optional).

\* Ive zero experience with newer cpu / emuvars driver + Oz, so I cant help.

\* Sorry I dont spoke Germany, good luck.
