## **USB 3.0 Karte unter Sierra mit Clover (VIA Technologies - VL80x xHCI USB 3.0)**

**Beitrag von „vankomicin“ vom 31. März 2018, 21:01**

Hallo [@MrLight](#),

sorry for English. I also have a P5w motherboard and want to do a fresh install of Sierra but am stuck at the beginning. I am not new to hackintoshes and have built many (10.11 on P5W also). How did you install Sierra? Clover version, kexts and cofig.plist settings would be very helpful. Thanks!
