macos high sierra asus maxium VI

Beitrag von „patricia2626“ vom 5. April 2018, 03:17

i try macos high sierra before it worked and the problem may be new apple format as not sure
i want 560 aero amd <https://www.amazon.com/MSI-RX-...fRID=JC2N5ARGXFGX8T7XAGNK>

youtube and people share there download dmg imagen to format and restore as i try to use
virtualbox to edit config and use clover tools to make it bootable as it work before
