

## Erledigt Thinkpad T430 Filevault 2 Clover

Beitrag von „WeWin“ vom 9. April 2018, 19:54

Hi,

ich habe mittlerweile ein Thinkpad T430, welches super durch [@Sascha 77s](#) Clover-Ordner funktioniert, nur leider bekomme ich trotz einem ganzen Wochenende voller Versuche nicht Filevault zum laufen.

Leider habe ich alle Treiber, welche in diesem Thread genannt werden benutzt, nur ohne Erfolg. <https://www.insanelymac.com/fo...topic/317290-filevault-2/>

Meinen Clover-Ordner ohne Konfig habe ich mal angehängen.

Hier die Fehlermeldung:

```
