[@BlackOSX](#) i have an other "hackbook"..

I need help to patch a DSDT..

Can you help me if i create a new topic?

Is One Sony Vaio VPCEH with intel core i3 2330m 4gb ram and geforce 410M.

Now i have yosemite because with high sierra i have some problem with graphics card...

In this laptop now not work only the battery status..

I have and ssdt.

My DSDT was edited by InsanelyMac Team but it isn't prefect...
