

Erledigt **ASRock Z370 Extreme4 fast perfekt...aber...**

Beitrag von „cyberdott“ vom 2. Mai 2018, 22:32

Ja, das nutze ich immer bei Kext-aktionen im Bereich /S/L/E

Hab nun alles zurückgedreht aber vdadecodercheck geht immer noch nicht...obwohl die Hardwareunterstützung wieder auf ja steht...muss ich net verstehen...

```
cyberdotts-iMac:~ cyberdott$ /Users/cyberdott/Downloads/VDADecoderChecker ; exit;
```

```
VDADecoderCreate failed. err: -12473
```

An error was returned by the decoder layer. This may happen for example because of bitstream/data errors during a decode operation. This error may also be returned from VDADecoderCreate when hardware decoder resources are available on the system but currently in use by another process.

```
VDADecoderCreate failed. err: -12473
```

```
logout
```

```
saving session...
```

```
...copying shared history...
```

```
...saving history...truncating history files...
```

```
...completed.
```
