Nvidia gtx 1080 display port audio issue

Beitrag von „bbmatias3“ vom 5. Mai 2018, 09:05

Hello I was wondering if anyone knows how to enable audio on gtx 1080 via display port? I figured it out but had to do a fresh install and can't get it to work. Display port audio enabled my monitors speakers to work

i put lily and nvidiagraphicfix

in library extensions
