Nvidia gtx 1080 display port audio issue

Beitrag von „al6042“ vom 9. Mai 2018, 21:14

Hi there...

Do you already use a patched DSDT which contains the necessary settings to get HDMI-Audio from discrete graphics working?

If so, just add the following KextsToPatch-Entry and see if it works:

Name	com.apple.driver.AppleHDAController
Find [HEX]	DE100B0E
Replace [HEX]	DE10F010
Comment	GTX1080 HDMI-Audio
