## **Does Oz understand Xeon CPU's and how to make it work?**

**Beitrag von „griven“ vom 11. Mai 2018, 14:40**

Okay. About your [Bios Settings](#) please make sure that CSM Mode is active for the moment also make sure Secure Boot is disabled. The black Screen issue normally is an issue when the Bios and/or OZ fails to initialise the selected primary GPU. Also disable any FastBoot settings in Bios as well.
