Hi [@NoirOSX](#) [@anonymous writer](#) version 2.0 and above does not seem to have multitouch support. So we need to wait for that to happen.

Regarding the EFI build. I changed the ig-device-id to match HD615 in the EFI attached also added IMEI patch. Yet despite the Kexts patch, HDMI audio doesn't go yet. I applied the following:

Find:

02040A00 00040000 87010000

Replace:

02041200 00080000 87010000

(12 stands for increased delay as per ReHabMan advices.)

Installed /L*/E*:

FakePCIID.kext

FakePCIID_Intel_HDMI_Audio.kext

Prior to plugging in the HDMI, the port shows 00 08 00 00 as connector type on AppleIntelFramebuffer@2. Yet after plugging it reverts to 00 04 00 00. Screen works correct yet HDMI audio not yet.

[@NoirOSX](#) do you have any idea on this one?
