Erledigt Need help with MSI Z97 Gaming 7

Beitrag von „MrTrip" vom 20. Mai 2018, 15:05

Well, I figured it out. Dumping OZMTool on its face and using UEFITool I was able to inject Ozmosis and the things I needed, and all was well and good. Flashed, and currently back on Sierra. High Sierra was becoming a pain so I just went back to what is familiar 🙂
