Erledigt Lenovo T61 mit nVidia Quadro NVS140m Backlight Probleme

Beitrag von „miljoneir" vom 20. Mai 2018, 15:10

I am able to change brightness using the latest clover and the dsdt from the el capitan thread and using an app to change brightness.
It is in the appstore and is called "Brightness Slider".
https://itunes.apple.com/us/app/brightness-slider/id456624497?mt=12
You can then set your own keyboard shortcut.

Tested on both sierra and high sierra.

But did you ever found out how to get brightness change to work normally?

I'm sorry for the reply in English, I can read German but not really write it.
