## **ATI Mobility Radeon HD5650 auf Acer Aspire 7741G**

**Beitrag von „Admiral154“ vom 22. Mai 2018, 04:28**

Yes, I understand this, but Whatevergreen it's like a separate driver, in the window about mac downloadable driver WEFR-117-2018-03-30. In the CINEBENCH R15.038 opengl 27.5 fps. I do not need to get more performance from the graphics card, but I'd like to start video card correctly, because there are unpleasant lags in the system.
