Does Oz understand Xeon CPU's and how to make it work?

Beitrag von „firefly_can_fly“ vom 2. Juni 2018, 23:11

Yesterday I unfortunately encounter a problem and don't understand what it is and how to manage it. Everything was okay, but after I turn off pc and went to work, after came back home and turned on the pc - it went south like that:

https://drive.google.com/file/..._hM2wf/view?usp=drivesdk

Whay I did :

Refladhed bios, tried couple, bios setting, different ssd's with pre-installed Mac os. Eventually the results are the same, it just blink and nothing booting. Verbose or other mode - not working.
