Hilfe zu Sound unter Neuinstall 10.13.5

Beitrag von „rockyridge“ vom 7. Juni 2018, 15:23

Also, nach langem probieren und etlichen Flüchen, läuft jetzt ein frisch installiertes High Sierra 10.13.5 auf meinem Hackintosh. Das einzige was ich jetzt noch benötige ist funktionierenden Sound (und Ruhemodus, der kommt dann aber später...).

Ich habe bisher AppleALC.kext in den Kexte Clover Ordner geschoben, ohne Erfolg, und einmal mit Kext-Utility geladen, ebenso ohne Erfolg. Auf dem Board befindet sich ein Realtek® ALC887. Mein Clover sieht wie folgt aus:

Name	Path	Size
AppleALC.kext	System, 21487	176 KB
AppleAPIC.kext	System, 19128	23 KB
AppleACPIPlatform.kext	System, 21482	...
