Installation of Mojave with Ozmosis using HD 4600

Beitrag von „ammoune78“ vom 16. Juni 2018, 21:55

I have nothing in the EFI folder because it never get loaded, the reason is KernextPatcher and AcpiPatcher log file aren't there, if not it the log isn't in efi it explain that reboot loops, it can not read the EFI partition, same thing for the Mojave usb installer.

Here's my entire rom so you can check it
