Erledigt Installation of Mojave with Ozmosis using HD 4600

Beitrag von „al6042" vom 16. Juni 2018, 21:58

Ups... that sounds bad...

do you have more than one HDD or SSD in your System?

EDIT:
One thing I found in your Defaults.plist...
the decimal number for `FirmwareFeatures` and `FirmwareFeaturesMask` are different to whatever I have seen

Since your EFI doesn't seem to work, please add the attached Defaults.plist into a test.rom and see if that helps.
