SAPPHIRE Radeon RX 580 8GB Nitro+ changing the BIOS part number (PN) for permanently showing of the right name

Beitrag von „DSM2“ vom 12. Juli 2018, 02:47

Much easier way is to use the PropertyInjector Kext method by [@Brumbaer](#) for this if you ask me.

Or another way is to put the Rom file of one of these Pulse 580's in the efi rom folder and set LoadVBios.

But anyway - good to have an alternative way for it.
