## How to remove empty boot device in Gigabyte Bios?

**Beitrag von „ductator“ vom 25. Juli 2018, 17:03**

Use Clover's EFI shell.

Code

1. `bcfg boot dump`

to show all boot entries,

Code

1. `bcfg boot rm xx`

where xx is the shown number to remove the "Mac OS X" entries. Use first command after each removal to relist all boot entries and chose accordingly.
