Oz Gi-Z77P-D3 Alc887 soundcard don't work

Beitrag von „chronicie“ vom 5. August 2018, 11:15

[@al6042](#) Thank you for the DSDT file you provided,i try the 1-5 does'nt work! but I see the relevant posts at the bottom, I replace AppleALC.kext with AppleALC-OZM.kext, the audio device began to work ! Very happy ~:D

now ,I had a question about AppleALC, Do AppleALC file need special processing to use with ozmosis?

[{Gelöst} Gigabyte Rev1.1 Z77P-D3 encounter problems Audio and Network don't work](#)
