macOS Mojave Ozmosis BETA – OZ167X-XMAX

Beitrag von „kuckkuck“ vom 14. August 2018, 13:59

[Zitat von nrchandar0100](#)

i request you to present simple and step by step guide [in English] for people like me

I'm afraid I can't provide that...

Also I don't know how much knowledge you have. If you are capable of building your own ROM, try to translate the first post in this topic and add the provides ffs-files to your ROM.

If you don't have any knowledge about building Ozmosis-ROMs you can either [try to learn that](#) or just hand me your ROM and I will add everything that's necessary to your BIOS-file.

Nevertheless I'm not willing and don't have the time to provide a simple step by step guide that anybody can understand since I provide files that are at the moment only for testers with basic knowledge of the technology and furthermore don't have the time to write such a guide, that doesn't even exist in german at the moment...
