Erledigt **macOS Mojave Ozmosis BETA – OZ167X-XMAX**

Beitrag von „nrchandar0100" vom 14. August 2018, 15:00

Thank you very much for quick and speedy response. I have fair knowledge about Ozmosis and i have already had ozmosis in my boot loader when i was using el capitan.

By your guide what i have understood is i have to download 167-x mass and insert every ffs files you have provided by mm tool. am i correct ?. As i do not want to take risk. i would like to present my pc details so that you can create one for me. GA Z-97 D3H mother board with 4th gen processor. G force 710 graphics card. 12 gb ram and samsung M2 SSD 500 GB. i have made ssd in to two partitions for high sierra and mojave beta 6. By using clover i am able to boot booth OS. The current config plist is attached. Please help me. Do you know i am 60 years old living in south India

Thanks and Regards
