macOS Mojave Ozmosis BETA – OZ167X-XMAX

Beitrag von „nrchandar0100“ vom 14. August 2018, 17:31

Hi

I installed the ROM. when i tried to boot the os it shows no boot device or hdd found. i am able to see logo screen of ozmosis after that it says connect the HDD and reboot. As i told you my disk is M2 SSD and i think it is the problem. usually earlier when i installed the ozmosis when i go to bios under peripherals i was able to see the os name as mac os x or sierra. now that is missing in the bios and it shows only as samsung evo .

Please help me to solve the problem
