macOS Mojave Ozmosis BETA – OZ167X-XMAX

Beitrag von „diy2018“ vom 15. August 2018, 14:35

[kuckkuck](#)

About your problem: Deactivate the HD4600 in your BIOS. MacOS Mojave can boot normally, which means that the HD4600 must be turned off in the BIOS with a single display, and the HD4600 boot will be stuck in the Mac logo.
