[@kuckkuck](#), Hi, Ozmosis not support IQSV (Intel Quick Sync Video) with NVidia or AMD graphic cards in Mojave Beta? Only one AMD/NVidia/INTEL HD boot?

I get freeze on Mojave boot, i see Apple Logo on black screen without progress bar, if intel hd is turned ON in BIOS, but if OFF -> normal boot with progress bar -> i see normal desktop.

Ozmosis + IQSV + High Sierra <- i get the normal boot) wtf?!)))
