Hi,
Great to see you again.
Still the problem persist. My clover boot loader automatically boots the SSD.

Hi,
I tried all the ways but nothing happened. I think i have go back to clover boot loader. But one humble request. If you have time please prepare one bootloader with alternative boot flag and send me. Is there any patch required for M2 ssd ?. Why i am making this request is my knowledge is limited in coding and etc, if i do anything wrong i may loose my motherboard and will be in mess.
Hope you will help me.

Thanks and regards
