macOS Mojave Ozmosis BETA – OZ167X-XMAX

Beitrag von „nrchandar0100“ vom 16. August 2018, 15:33

Hi

thanks. when reboot the system after installing and pressing the option key the boot disks are not shown as High Sierra and Mojave. they are shown as UEFI OS and another UEFI OS. next is i installed the lilu kext and whatever green kext on the bios itself after converting them as ffs files using kext to ffs as i have space on the bios. still the same problem was there. Sorry i am troubling you a lot. kindly excuse me.

regards
