macOS Mojave Ozmosis BETA – OZ167X-XMAX

Beitrag von „kuckkuck“ vom 17. August 2018, 15:27

I thought you were testing Mojave, weren't you?

So your M.2 doesn't appear as a Boot option. Have you tried adding a new boot entry for it?

[Zitat von kuckkuck](#)

```
Use the UEFI shell and navigate to your boot.efi e.g: fs0: --> cd
System\Library\CoreServices --> bcfg boot add 0 boot.efi "Mojave"
```
