macOS Mojave Ozmosis BETA – OZ167X-XMAX

Beitrag von „dcfgfs“ vom 25. August 2018, 18:44

Thanks for sharing

I have a GA-B75M-D3V motherboard. Can I use it on this?

Because I am trying to generate a BIOS with Ozmosis and plan to install MacOS high Sierra 10.13.6 😊

From Google Translate.
