

Erledigt Mojave auf x230

Beitrag von „kinetos“ vom 26. August 2018, 12:11

Hello I'm french user. I've Lenovo X230.
My hackintosh had worked fine with sierra and high sierra.

Since I've updated my system to Mojave I've always the same problem... My laptop have a boot loop when the apple logo appears... Anyone have a solution to solve that?

I've tried to do a clean install and same thing, I don't understand what happens.

(sorry for my bad english)

Lenovo X230 : i5-3210M / Intel HD 4000 / 128GO SSD / 16GO 1600MHZ memory
