Audio layout-id not inject. Ozmosis [EN]

Beitrag von „MrVanosh“ vom 1. September 2018, 13:45

[@kuckkuck](#) I use newest Lilu and AppleALC but it not work (I've tried many variat

by you but changes).

DPCIManager not shows CodecID etc.

Codecdetect by toleda too shows no audio codec detected.

Code

1. File: audio_codecdetect.command_v2.2
2. No audio codec detected
3. Verify BIOS, hardware, etc.

Of course in bios I have enabled audio and it works with VoodooHDA(but I don't want use this kext, I prefer AppleALC) and Windows.
