## **How to do customize the Ozmosis (OZ) GA-Z170-HD3 motherboard BIOS?plz**

**Beitrag von „cehos“ vom 5. September 2018, 08:34**

Hi,

there is possible to create OZ bios on 100 series motherboards but it`s more difficult than old series. Unfortunately you have motherboard with 64 Mbit bios and there is no space for Ozmosis. More space is in 128 Mbit. Have a look on this link. There is step by step guide: <https://www.insanelymac.com/fo...ries-skylake-cpus-and-up/>
