Sierra auf einem Lenovo E460

Beitrag von „ramzha“ vom 10. September 2018, 14:15

Thanks! I Upadted my bios via Lenovo software, claims to be the latest, 1.34 i guess. Ill edit this message later today, if its not.

Is there anyway to disable the discrete graphics card (radeon r7 m360) just not to drain battery level. As far as I know there no way getting them working together.
