## Sierra auf einem Lenovo E460

Beitrag von „Harper Lewis“ vom 12. September 2018, 09:51

You should try [Kext Updater](#), a tool developed by [@Sascha\\_77](#). Launch the app and download the latest version of Clover, then install Clover to your hard drive (the first two checkboxes UEFI mainboards/ESP have to be ticked). Check drivers as seen [here](#). Then copy your kext files, config.plist and ACPI-files from your USB-drive to the EFI-partition of your hard drive and reboot.
