High Sierra mittels Clover auf Gigabyte H370M D3H GSM installieren

Beitrag von „al6042“ vom 14. September 2018, 08:00

As mentioned in other threads, the iMac18,2 and 18,3 are working well if there's a AMD or Nvidia Graphics in place.

If the machine just uses the Intel HD Graphics, iMac18,1 is to be preferred, since the other SMBIOS variants will definitely lead to graphical issues.
