Intel Quick-Sync mit WhateverGreen

Beitrag von „iMarc“ vom 23. September 2018, 20:44

[@Altemirabelle](#) sorry, meine aussage bezog sich nicht spezifisch auf den 4790k sondern allgemein für die haswell architektur.

hier sieht man schön welche architektur was kann - hevc hardwarebeschleunigt geht erst ab skylake, 10bit ab kabylake

MediaFoundation Quick Sync Video format support

The following table shows Intel format acceleration support for various Intel platforms.

	Cherrytrail	Cherrytrail / Atom	Broadwell	Haswell / Haswell Pro	Haswell / Haswell Pro	Haswell / Haswell Pro	Haswell / Haswell Pro	Haswell / Haswell Pro	Haswell / Haswell Pro	Haswell / Haswell Pro
HEVC/H.265	Decoding only	Decoding only	Decoding only	Yes	Yes	Yes	Yes	Yes	Yes	Yes
H.264	Yes	Decoding only	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
VVC	No	No	Decoding only	Decoding only	Decoding only	Decoding only	Decoding only	Decoding only	Decoding only	Decoding only
JPEG	No	No	No	Decoding only	Decoding only	Yes	Yes	Yes	Yes	Yes
VP9	No	No	No	No	Decoding only	Yes	Yes	Yes	Yes	Yes
HEVC/H.265 10-bit	No	No	No	No	No	Decoding only	Yes	Yes	Yes	Yes
VP9 10-bit	No	No	No	No	No	No	No	Decoding only (AV1)	Yes	Yes
VVC 10-bit	No	No	No	No	No	No	No	Decoding only (AV1)	Yes	Yes
VVC 12-bit	No	No	No	No	No	No	No	No	Decoding only	Yes

Caution: Use Intel Quick Sync Video for operation with a video content entering in Adobe CC2018. The hardware does not support Quick Sync.
