## **macOS Mojave Ozmosis BETA – OZ167X-XMAX**

**Beitrag von „seabo1224“ vom 25. September 2018, 19:57**

Hi I am trying to install Mojave with the CPU i3-3225 (HD4000) and GA-H77TN. I can install High Sierra in the platform correctly with OZ167X-XMAX. It stucks in the Mac logo when install Mojave. Is there any way to solve the problem?
